

# Nature in Your Neighborhood

Let's discover, investigate, and reflect on the world around us!

name \_\_\_\_\_

class \_\_\_\_\_

date \_\_\_\_\_

teacher \_\_\_\_\_

**1** Review: Write down your observations/discoveries from your nature space and your local trees:

**2** Observation: Did you know there were so many different creepy crawlies in Kentucky? Draw or describe your favorite creature below:

**3** Action: Leaf Monsters  
Supplies: Leaf/leaves, markers or paint, googly eyes  
Create your best leaf monster using some characteristics of the creepy creatures from the video! Take a picture of your creation to share with others

**4** Up Next: Research  
Based on our brainstorm from session 3, pick one aspect of nature you want to investigate and form a question to investigate. Write your question below:

**5** Preparation: Before next week you should...

- Observe changes in your nature space
- Discover one observation or question you have about nature in your neighborhood
- Research your nature question and bring back one fact to share.
- Explore the Seek App
- Take lots of pictures!
